FXVPS

Brand guide

How to use the FXVPS name, logo, colours and banners. For brokers, partners, affiliates and the press.

fxvps.cloud/partners

2026

01 · LOGO

The FXVPS logo

The logo is the candle tile and the FXVPS wordmark together. Use the full-colour version whenever you can. Write the name as FXVPS: capitals, one word.

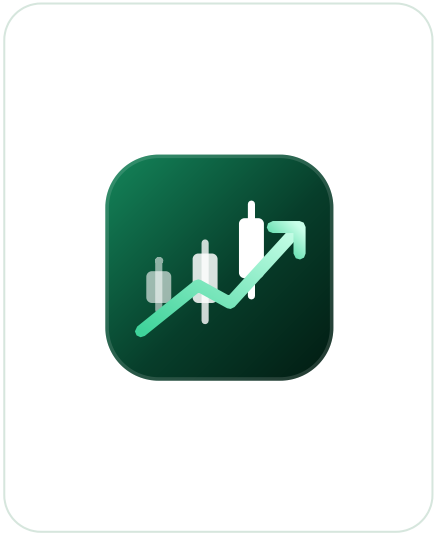

02 · VARIANTS

Other versions

Use the stacked logo in square spaces, the icon where space is very small, and the one-colour logos for print, engraving or single-colour media.

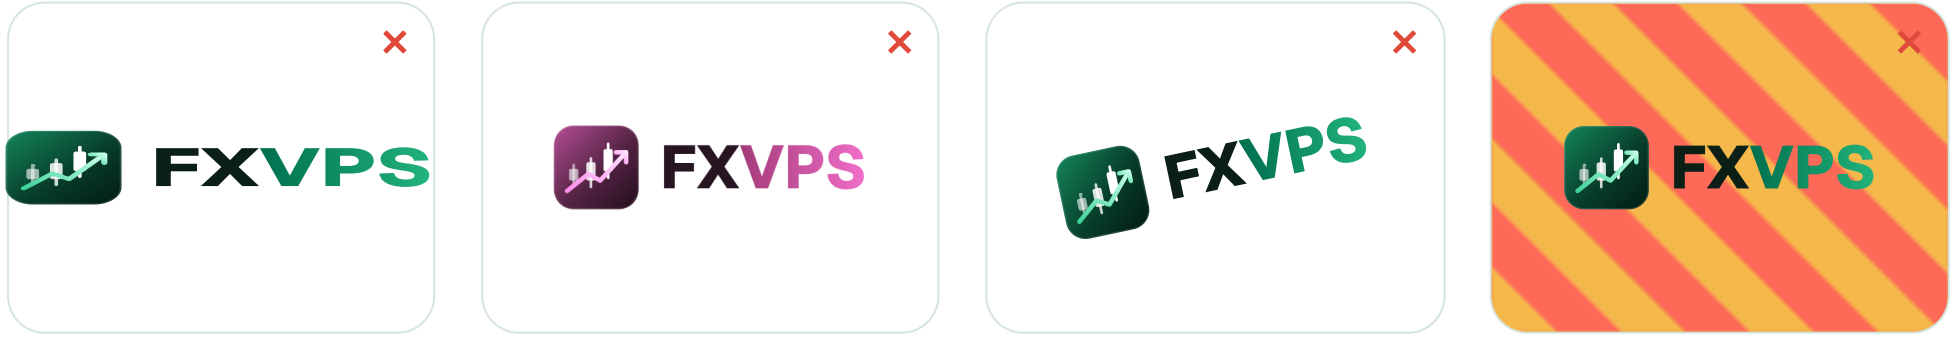

03 · CLEAR SPACE AND MISUSE

Give it room

Keep empty space around the logo at least as tall as the "F". Never place it smaller than 24 px high on screen or 8 mm in print.

Do not stretch · do not recolour · do not rotate · do not place on busy backgrounds

Colours

Green on deep forest is the FXVPS look. Use Mint only on dark backgrounds.

FXVPS Green
HEX #00704F
RGB 0 112 79
Primary, buttons, links

Deep Forest
HEX #04261A
RGB 4 38 26
Dark backgrounds

Mint
HEX #7CF0C2
RGB 124 240 194
Highlights on dark

Signal Green
HEX #3FD39A
RGB 63 211 154
Charts, accents

Ink
HEX #0B1F17
RGB 11 31 23
Text on light

05 · TYPE

Typography

Headlines and text use Geist. Numbers, labels and code use Geist Mono. Both are free under the SIL Open Font License.

Aa Geist

Headline 800 · Body 400–500

Aa 1.0842

Geist Mono · prices, labels, specs

Badges and banners

Put a badge on your website, client area or email footer, and link it with your partner link. All banners are in the brand kit ZIP.
